The MAN INC DATE of this communication and		Faye Fleming	3616					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status 1)☐	Responsive to communication(s) filed on _

Art Unit: 3616

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed September 12, 2001 has been entered and acknowledged.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "said spring assembly unit is arranged in front of and behind said vehicle axle" is unclear. Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1-6, 8-17 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bublies, et al (6,129,367) in view of Olley (2,300,844).

Application/Control Number: 09/890,381

Art Unit: 3616

Bublies, et al discloses an axle suspension comprising a four-point connecting rod 4; two vehicle axle joints 7, 8 connecting two points of the connecting rod to the axle; two vehicle body joints 5, 6 connecting two points of the connecting rod to the vehicle body; a first axle strut 11 extending in a longitudinal direction of the vehicle and connecting the axle to the vehicle body; a second axle strut 12 extending in a longitudinal direction of the vehicle arranged on a second side of the vehicle and connecting the axle to the vehicle body; a first molecular joint connecting the first axle strut to the vehicle axle; and a second molecular joint connecting the second axle strut to the vehicle axle. Bublies, et al teaches joints having ball-and-socket joints; a third molecular joint connecting the first axle strut to the vehicle body; and a forth molecular joint connecting the second axle strut to the vehicle body, as shown in figure 1.

Page 3

Bublies, et al discloses the claimed invention except for spring assembly units. Olley teaches a spring suspension comprising a shock absorber unit 31, 32 and a coil spring unit 27, 28. The spring assembly unit is arranged in front of the vehicle axle. Olley also teaches mounts 25, 26 for the spring assembly units. Based on the teachings of Olley, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the suspension of Bublies, et al to include spring assembly units to provide a damper for the suspension.

Allowable Subject Matter

7. Claims 7 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 09/890,381

Art Unit: 3616

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Mikaelsson, et al and Blank, et al references each disclose some features in common with the present invention such as a suspension comprising rigid axle mounting.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye Fleming whose telephone number is (703) 305-0209. The examiner can normally be reached on M-F (9:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on (703) 308-2089. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-2571 for regular communications and (703) 308-2571 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1113.
